EXECUTIVE SUMMARY

In a world where there are people who suffer mistreatment from the people they love, just because of how they dress or simply because of who they are, the fact of being lesbian, gay, bisexual, transgender or intersex (LGBTQ+), implies having to endure discrimination on a daily basis. These harassments can occur because of the person's sexual orientation (who they are attracted to), their gender identity (how they define themselves as a person, regardless of their biological sex), their gender expression (how they express their gender when dressing, hair or makeup) or your sexual characteristics (for example, your genitals, chromosomes, reproductive organs or hormone levels).

From name calling to harassment to denial of work, health care or even access to the traditional financial system, the range of discriminatory treatment is as wide as it is harmful, and can even be deadly. For example, LGBTQ+ people are whipped, humiliated, and sometimes even killed, just for being who they are. So much so, that between 2008 and 2018 almost 3,000 deaths were recorded for these reasons of hatred, humiliation and discrimination towards LGBTQ+ people. Some of the countries where their citizens tend to be more intolerant are Brazil, Colombia and Mexico, where only in that period there were some 260 people murdered by intolerance and hatred among these three. In other words, in that period of time about 9% of the cases were concentrated in these three Latin American countries.

In most of the countries, not only in Latin America, but in the world in general, data on violence against trans and gender-diverse people are not systematically produced and it is impossible to have concrete data on the cases of victims, so these numbers could be much higher.

Currently there are more than 70 countries in the world where sexual relations between people of the same gender are considered a crime and in 9 of them, such as Saudi Arabia, Iran or Sudan, these “crimes” can be punished up to the death penalty. On the other hand, LGBTQ+ rights activists have overcome enormous challenges, endangering their own security by taking on the task of denouncing human rights abuses of the LGBTQ+ population, and fighting to try to generate changes in the laws that generate these discriminations.

Since the concept of Pride was introduced and international recognition days were established, such as the International Day Against Homophobia, Transphobia and Biphobia (also known as IDAHOT), the LGBTQ+ population is forging alliances and promoting worldwide the feeling of pride to be as it is. The collective efforts of activist organizations around the world have borne real fruit, as currently, as of 2019, at least 43 countries classify homophobia crimes as hate crimes and of these countries, some 27 of them have already legalized equal marriage for people of the same sex.

Among those efforts for the inclusion and equal rights of LGBTQ+ communities, it was that we managed to conceptualize **OMAGE** to be able to give it the financial tool to be able to interconnect these groups traditionally marginalized by the traditional financial system to new technologies based on the blockchain and new tools for self-management of personal finances.

OMAGE, emerges as a tool based on blockchain and with the characteristics of a wallet but with new functions that range from encouraging savings, facilitating access to collective financing, loans and the promotion of DeFi products to support the adoption, usability and strength of our hand tool with unmatched support to the LGBTQ+ community

JUSTIFICATION

Currently, although collective organizations have made great and immense progress regarding the recognition of fundamental rights to the LGBTQ+ community, there is still a long way to go. We still have a very notable majority of countries where sexual relations between people of the same sex are considered a crime and a minority of retrograde countries that go to the extent of being able to sentence a person to death for simply being LGBTQ+.

This situation even in these times of the 21st century where in some countries in particular in the West, even thinking about hurting, hurting or even murdering another person because of their thinking or sexual preference, would be something inconceivable. These changes in cultural paradigms in the West have been generated thanks to the great effort of various activists for the fundamental human rights of the LGBTQ+ community, which has been the reward of years, decades of constant struggle, where martyrs will be remembered for their tireless fight for equality, respect and recognition of this community so that they can achieve access to the same rights as any other citizen of the same country.

Discrimination

That fear and discrimination suffered by the LGBTQ+ community has led them for years to be marginalized not only in their homes or by

their loved ones, but also in the same way in access to the same benefits for the rights they enjoy towards citizens of the nation where they were born. This humiliation is at all levels, starting with the fact even of the same identity, by the way of not being able to change their situation of how they are legally identified in society because in many of the countries a Trans or gender-diverse person is makes it impossible to update their new image and name that they want to project to society because there is simply no legal framework that protects them. This situation makes it very difficult for trans and gender-diverse people in particular to just be able to be cared for in a traditional banking institution, much less to be able to access their products for savings or credit. This means that these people are at a clear disadvantage compared to others.

Approach

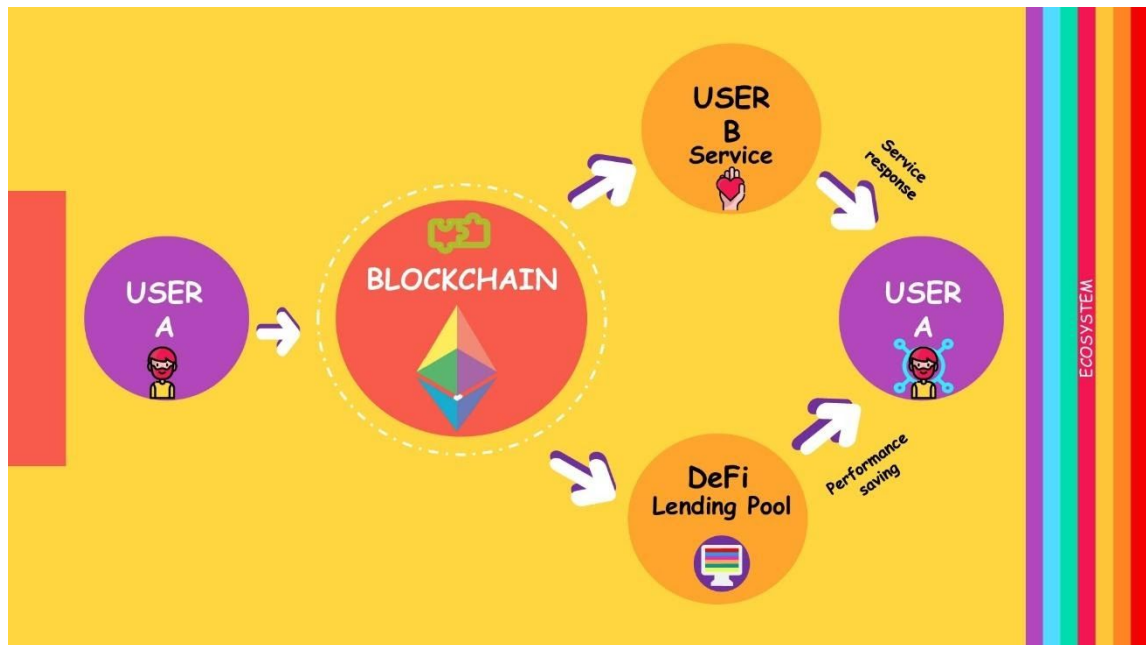

To solve this problem, always looking for a substantial improvement in the quality of life of our various users, mainly from the LGBTQ+ community, we have devised OMAGE, to be able to provide support, giving effective solutions in financial matters to create the necessary inclusion to those who unfortunately for years have been out from the traditional system through a mobile wallet app among others items in OMAGE Platform.

OMAGE's range of solutions is so broad in terms of personal finance, covering a range from micro payments, debit cards, interregional funds transfers, group savings, individual savings products, loans and financing systems through associated DeFi platforms.

SOLUTION - OMAGE PROJECT

OMAGE is a platform conceptualized in blockchain technology aimed at providing solutions mainly to the LGBTQ+ community in the financial area, micro payments and even their physical-psychological well-being. In addition to being supported safely and reliably in a structure of blocks where in a transparent, fast and simple way the registration of operations remains but preserving the anonymity of our users.

Fundamental mission

Primarily provide the LGBTQ+ community with a platform based on blockchain and the use of it, through which they can be included in the financial field, achieve effective solutions in the management, control and administration of personal finances, improve interconnection among the community for collective help and give you access to loans and new forms of DeFi savings. All this with the goal of substantially improving the quality of life of our users.

OMAGE Mindset

Consolidate ourselves as the tool that will provide the best, effective, safe and fast solutions to our users in the financial sector to contribute to their personal development so that they can access a better quality of life, making financial management more accessible, affordable , simple and fast.

OMAGE PLATFORM

The OMAGE platform can be purchased free of charge, as it does not merit payment for licenses. However, the essential requirement to be able to fulfill the functions, benefits and characteristics of the same, it is necessary to have the ERC20 token of OMAGE, which is our token to operate.

The platform, as it is based on blockchain technology, has a secure and virtually insurmountable system that provides security to its users to avoid possible malicious attacks by computer experts who wish to violate the security protocols of our system. We have the guarantee of the preservation of your digital money on our platform.

Benefits

Among the main benefits and characteristics that can be mentioned of the OMAGE platform, are:

- ❖ Free mobile wallet.
- ❖ Low fees.
- ❖ Debit Card.
- ❖ You can transfer from 0.01.
- ❖ Global Connectivity.
- ❖ Secure Warranty.
- ❖ Local currencies P2P allowed.
- ❖ You can have a saving account in Omage Token.
- ❖ DeFi Platform Connect.
- ❖ Friendly use.
- ❖ Financial freedom where you will have absolute control of your digital assets.

In this sense, OMAGE is not only a secure platform, but also provides effective solutions to financial difficulties in particular to our LGBTQ+ community, in search of improving personal finances, allowing to optimize the quality of life of the users of our platform.

OMAGE PLATFORM APPLICATIONS

OMAGE, is projected as the solution to a list of problems that the LGBTQ+ community presents in particular for their personal finances, such as:

- 1) Inclusion in the financial system.
- 2) DEBIT CARD **OMAGE** Visa.
- 3) Saving account in **OMAGE** and Ethereum.
- 4) Support in collective savings funds for medical purposes for trans and gender-diverse.
- 5) Send money across the world.
- 6) Connection with the DeFi platform to promote crypto savings and crypto loans

Inclusion in the financial system

In a society that habitually tends to discriminate against minorities and, in this case, a community that has historically been harassed, humiliated, mistreated and excluded both in terms of their fundamental rights, respect for their identity, their freedom and even access to the financial system traditional. All of this places them at a clear disadvantage to the rest. The fundamental objective of OMAGE is to provide the opportunity for the LGBTQ+ community to have access to the new technologies that have been developed in the financial sphere in recent years, primarily with cryptocurrencies, which has allowed the inclusion of vulnerable sectors, with little access. to traditional banking and to be able to welcome the new forms of management, self-control, self-management, savings and loans that cryptocurrencies and decentralized finance (DeFi) provide

Debit Card OMAGE Visa

So if you were making a hypothetical consumption of 100USD and at the time of the transaction the rate of the BTCUSD pair was at

10,000, it means that the consumption with the debit card would be 0.01BTC which would be subtracted from the balance in your wallet. Same case for any of the other cryptocurrencies available and the rate at which they are listed for the moment of the operation. The rate of the cryptocurrencies that is used for reference of the transactions, will be the one shown by coinmarketcap.com

Possibility of saving in OMAGE and Ethereum.

As the adoption of our token grows, due to the different products and tools that we offer in particular with the objective of collective and individual savings of our various users, this in turn will generate greater capitalization for the token which consequently will also cause less volatility in price fluctuations and greater stability.

We have three possibilities for our various users to access different forms of savings, which we have

- ❖ **Staking.** The amount of coins can be placed in a "cold wallet" which will be kept with that amount of coins, fixed for a specified period and for this they will generate monthly interest for average balance, for contributing capitalization to the ecosystem.

❖ **Decentralized Finance Savings Pools (DeFi).** In interconnection with Fungi Swap's DeFi platform, funds can be placed in savings pools

❖ **Saving with collective support.** A specific area was devised where the trans or gender-diverse user can access in order to request support from the LGBTQ+ community that make life in **OMAGE** to support the applicant in their desire and dream of being able to have surgery to achieve their gender change, for medical aid of any kind or even a project in which you want to undertake. These contributions will go to a wallet which in turn will be in a Staking or a DeFi savings pool so that in addition to the collective contribution, they will also generate dividends.

All these forms of savings devised by the **OMAGE** team can be used both in our native token, and in Ethereum (ETH) and these strategies are thinking about the well-being of our LGBTQ+ community so that together we can help each other to obtain a better quality of life.

Sending money around the world

With our native OMAGE token, in association with the DeFi platform of Fungi Swap and others with related platforms, we have the clear and absolute intention of not only being able to give the tools of inclusion to the LGBTQ+ community but also provide ways that allow them to go reaching our various users a greater financial independence that can only be achieved with cryptocurrencies. This process in turn is also focused on a constant improvement in the quality of service, this will allow our token to also be a source of interconnection between different latitudes. The money you have in OMAGE, can be exchanged for various cryptocurrencies and these in turn for Stablecoins or for the currency of your locality through P2P platforms with which we have agreements and associations.

These procedures in traditional banking, sometimes take days and generally lead to high commissions when transferring money from one country to another. With our token and in association with DeFi and P2P platforms, this type of transaction will be possible with a very low cost, in a matter of minutes and not days, coupled with the preservation of anonymity of the user in their transactions .

Connection with DeFi platform to enhance crypto savings

Decentralized Finance or DeFi are currently changing the way of seeing the traditional way of saving and applying for loans as they were observed in daily life in traditional banking. These present the potential of stability, transparency and reliability that blockchain technology offers by being, among other things, like an open accounting book where the record of all operations can easily be observed and these are unalterable.

Our platform in association with the DeFi platform of “FungiSwap” allows us to offer our users an interconnection with this service where through cryptocurrencies you can find possibilities to give a better performance to your cryptocurrencies by submitting them to savings plans or if the case were, apply for loans.

Low fees cost.

Traditional platforms sometimes in addition to being cumbersome, with undesirable response times and high costs for being able to use them also tend to be unsafe and at the time of a mishap the customer service is lousy.

There are cryptocurrency platforms that currently have a well-established reputation and, having achieved that, they have been increasing the cost of their commissions (fee) to be able to transact on them, making them currently expensive to operate there.

Our platform has an easy-to-use, self-managed, fast and secure operation for the various operations that you are going to carry out. All this at a low cost with a constant rate fee that will be imperceptible in the use of our platform and in such a way that it does not affect the balance that has in mind in a way since our objective is to be able to provide a quality service to a low cost for the greater scope and massification of our product.

MOBILE APP – OMAGE

The **OMAGE** platform will be a tool to simplify and enhance the personal finances of all diverse users, mainly from the LGBTQ+ community, and seek in general to provide security, automation, speed and innovation. The application has the following functionalities:

- ❖ Summary
- ❖ Staking
- ❖ Savings with collective support
- ❖ Connection with Fungiswap

Summary

In this option you can find the summary of the wallet broken down as follows:

- ❖ Transfer and balance of wallets:
 - ✓ Main wallet with balance in **OMAGE** token
 - ✓ Main wallet with balance in ETH and DAI
 - ✓ Wallet for debit card **OMAGE**
 - ✓ Wallet for Staking
- ❖ Saving with collective support:
 - ✓ Request status
 - ✓ Current balance
- ❖ Yield in FungiSwap Protocol Plans
 - ✓ Request status
 - ✓ Current balance
- ❖ Loans request in FungiSwapan
 - ✓ Request status
 - ✓ Current balance

Staking

Staking consists of leaving cryptocurrencies blocked in deposit to expect to receive a return from them, within a specified period. This can be done with the **OMAGE** token, where coins can be transferred from the “main wallet” to the “staking wallet” to be able to leave a certain amount of **OMAGE** for a certain time and the user will be guaranteed its corresponding performance.

This tool allows our various users to save in order to see their funds increase over time but also at the same time gives usability, adoption and capitalization to the currency which helps to provide greater solidity, support and security to all our diverse community.

Savings request with collective support

It is a segment intended for fundraising with collective support, it will serve various purposes but with the intention of being able to help each other among all of us who make an active life within the LGBTQ+ community. To do this, just fill out the following precautions:

- ❖ Create and name your campaign
- ❖ Define the amount of money you need to reach
- ❖ Select type of campaign
- ❖ Enter region or country of residence
- ❖ Define campaign category
- ❖ Add an image and / or video to your campaign
- ❖ Tell your story, reasons and motivations
- ❖ Define if the money raised will go to a Staking or a DeFi savings pool
- ❖ Accept the terms and conditions

Once the fundraising goal is achieved, the money will be available to him or the applicant.

Connect to FungiSwap

In this module you will find the invitation link to connect with the FungiSwap platform. On this platform you can carry out various financial procedures, including managing savings plans or applying for loans. Once this procedure is completed, this module will show you two options, visualization, but not management. These two options that it would show in case of having carried out the management, would be the following:

- ❖ **Yields from savings plans in FungiSwap.** This segment is only going to show a balance summary that it maintains and the performance obtained in the operations carried out in the external platform DeFi of FungiSwap.
- ❖ **Status of the loan application in FungiSwap.** This segment is only going to show the status of a loan application made on the external platform DeFi of FungiSwap.

TOKENS SALE

OMAGE's total offering is 8,000,000 (EIGHT MILLION) of tokens. The token sale began in 2020 with the 10% Private Sale Stage (800,000 / EIGHT HUNDRED THOUSAND), and continues in 2021 with the 10% Pre-ICO Stage (800,000 / EIGHT HUNDRED THOUSAND), and the main ICO Stage of 30 % (2,400,000 / TWO MILLION FOUR HUNDRED THOUSAND) and will end 2021 with a base price of 1 OMAGE = US \$ 0.10. In order to improve the token sale campaign and speed up the appearance of tokens on CoinMarketCap, OMAGE will also run multiple IEOs on different cryptocurrency exchanges.

Token allocation

Below is a detailed breakdown of the token information.
Percentage distribution of tokens shown below.

PRIVATE SALE	10% - 800,000
---------------------	----------------------

PRE-ICO	10% - 800,000
----------------	----------------------

ICO	30% - 2,400,000
------------	------------------------

RESERVE FUND	10% - 800,000
---------------------	----------------------

DEV TEAM / MARKETING	30% - 2,400,000
-----------------------------	------------------------

AIRDROPS	10% - 800,000
-----------------	----------------------
